This topographic map illustrates the Sagami River basin, highlighting the locations of three water quality measurement points: PE041, PE006, and LE051. The map features contour lines indicating elevation, with major peaks like Mt. Oosaka (大蔵山) and Mt. Katsuragi (葛城山) visible. The Sagami River (相模川) is shown flowing through the basin, with several tributaries. Key locations marked include Yamada City (山田町), Sagami City (相模市), and various smaller settlements like Katsuragi (葛城) and Oosaka (大蔵). The measurement points are marked with red dots and labeled in blue boxes: PE041 is located near the confluence of the Sagami River and the Katsuragi River; PE006 is located near the confluence of the Sagami River and the Oosaka River; and LE051 is located near the confluence of the Sagami River and the Katsuragi River. A north arrow is located in the top right corner of the map.
